

## *CCA in Our Community*

*In 2019, the Town of Union, joined the MEGA Community Choice Aggregation (CCA) program. Through this program, electricity rates were fixed for all eligible residents. Anyone who wished was able to opt-out for no fee.*

*By choosing a 100% green electricity supply, our community has had a major positive impact on environmental and renewable energy goals. By choosing a 100% renewable CCA program, the Town of Union is proud to be a leader and innovator in New York State. Across the state and the country we see additional communities following our lead and choosing to join together to go green.*

*This year, the CCA program is up for renewal. We will be considering new pricing and terms this spring and we will update all residents on the future of the program at that time.*
